

# Amoxykel 70

water soluble powder 

## Composition

1 gram of Amoxykel 70, soluble powder contains: Amoxicillin trihydrate eq. 700 mg Amoxicillin – Excipients up to 1 g.

## Target species

Non-ruminating calves, pigs, poultry (chickens).

## Indications

For prevention and treatment of infections caused by amoxicillin sensitive germs.

## Dosage and administration

This veterinary drug is administered orally.

### Pigs:

20 mg amoxicillin per kg body weight (b.w.) per day or 28.6 mg of the veterinary drug per kg b.w. per day for 4 to 5 days. To be administered with the drinking water.

### Chicken:

14 mg amoxicillin per kg b.w. per day or 20 mg of the veterinary drug per kg b.w. per day for 5 days. To be administered with the drinking water.

### Calves:

10 mg amoxicillin per kg b.w. or 14.3 mg of the veterinary drug per kg b.w., twice daily, for 3 to 5 days. Administer with the drinking water or in the milk.

Administration in the drinking water.

In case of administration in drinking water, the solution should be prepared with fresh, potable water. The exact amount of the veterinary drug required for one day should be calculated, based on the prescribed dose, the number of animals to be treated and their weight, using the following formula:

$$\frac{\dots \text{ mg product/kg b.w./day} \times \text{Average b.w. (kg) of animals to be treated}}{\text{Average daily water consumption (liters) per animal}} = \dots \text{ mg product per liter of drinking water}$$

## Pack size

1 kg.
